

World Hepatitis Day

Sunday, July 28, 2019

Individuals born between 1945-1975 are more likely to unknowingly live with Hepatitis C than any other age group. Unless detected and treated it can cause liver disease, cirrhosis and liver cancer. **Get screened today!**

Hepatitis C Screening Days

- Call to book an appointment
- Please complete the consent and screening forms prior to coming in
- You will be asked to remain in the pharmacy for at least 20 minutes to wait for the result of the test
